

MORTEX[®]

Mineral Skin

Technical and decorative micro-mortar
« waxed concrete » type

MORTEX[®]

A WIDE RANGE OF OPTIONS

Micro-mortar « waxed concrete » type for technical and decorative covering, MORTEX offers you a wide range of options for your new-build or renovation projects :

- Both indoor and outdoor
- From floors to ceilings
- From showers to swimming pools
- For furniture and high-end decoration
- Available in various shades enhanced by stunning effects and finishes

Our vast experience in sealing and renovation techniques has enabled us to develop a range of coatings offering various technical performance characteristics :

- Impermeability
- Flexibility
- Adhesion
- Resilience
- Fine thickness
- An extensive range of shades and looks

MORTEX®

COMBINING
TECHNOLOGY
AND
AESTHETIC
APPEAL

Thanks to its outstanding waterproofing properties, MORTEX is the ideal solution in bathrooms. It is the perfect product for Italian-style showers, baths and sinks, steam rooms, water walls, etc.

FREEDOM OF EXPRESSION

*Swimming pools don't all have
to look the same - swim away in
your imagination.*

MORTEX opens the door for
your creative ideas allowing you
to choose from a vast array of
designs and shades.

CONTINUITY IN STYLE

MORTEX opens your spaces by creating continuous surfaces respecting technical limits.

MORTEX can be applied on a screed floor with an adapted underfloor heating system.

MORTEX®

A PRODUCT THAT IS A PERFECT FIT

Thanks to its **resilience**,
flexibility, fine **thickness**
and exceptional **adhesive**
properties, MORTEX can
be used on a wide range of
surfaces.

MORTEX[®]

THE ALLY OF MATERIALS

While MORTEX possesses many characteristics, egocentrism is certainly not one of them. MORTEX is altruistic as it goes with all other materials providing style and brio.

*It makes wood,
stone, ceramics,
metal and textiles all
look good.*

MORTEX®

A close-up photograph of a person's hand holding a long-handled metal trowel. The trowel is being used to smooth a grey, textured surface, likely a wall or floor. The hand is positioned at the top of the frame, and the trowel's blade is angled downwards. The background is a plain, light-colored wall.

AN ATTRACTIVE OPTION FOR RENOVATIONS

MORTEX easily covers existing tiling on both floors and walls avoiding arduous removal work.

MORTEX[®]

A SENSUAL MATERIAL

MORTEX embellishes all of your projects giving them a unique mineral look that is very pleasant to touch. An appropriate protection is necessary in some cases.

MORTEX®

LIMITLESS POSSIBILITIES

*Colours, shades, designs, textures
and effects - the only limitations are
those of your imagination.*

With MORTEX the surfaces coated
are given an elegant and timeless
look which is entirely personalised.

MORTEX®

A RESPONSIBLE AND SUSTAINABLE MATERIAL

Like all BEAL products, MORTEX meets the three key requirements of sustainable development.

Economy

The wide- ranging options for application and finishes offered by MORTEX provide each user with customisable added value.

Mixed on site, any excess of products can always be reused for other projects and/or other types of applications.

Social

The very nature of MORTEX and the on-site training opportunities encourage the use of local labour.

Environmental

MORTEX allows existing surfaces to be recovered which not only results in limited waste but also far fewer restrictions for renovation or new-build projects.

A photograph of a modern building with large glass windows and a courtyard. In the foreground, there is a rectangular water feature with a dark, reflective surface. The water is still, reflecting the sky and the building. To the right, a large glass window shows the interior of the building, which appears to be a restaurant or cafe with tables and chairs. The building has a light-colored, textured facade. In the background, there are green plants and a cloudy sky.

Thanks to its fine
thickness and low
consumption, MORTEX
ensures lower
transport costs and a
significant reduction in
environmental footprint.

A person wearing a blue t-shirt and white gloves is using a MORTEX application tool to apply a textured blue material to a wall. The tool is connected to a green hose. The background is a solid blue color.

MORTEX[®]

AN ACCESSIBLE PRODUCT

Training

Users and designers can envisage new ways of applying MORTEX products every day.

Careful and efficient application requires the mastery of basic techniques.

A programme combining practice and theory

BEAL organises training on the MORTEX application techniques on an ongoing basis. We have training centres and experienced trainers. This training provides participants with an insight into the various application methods whether technical or decorative.

Interested ?

Find the description of the training sessions, the dates and the registration arrangements at www.bealtraining.com

MORTEX[®]

A TRADEMARK PRODUCT

BEAL is the **only company that develops** and **manufactures** the MORTEX brands.

Beware of imitations and counterfeits of BEAL trademarks, products and training courses. They do not meet the same quality standards and do not guarantee the same results.

Ask your installer for project references and check your choice on a sample using « ad hoc » protection before placing an order.

BEAL designs, develops, manufactures and distributes other highly technical products : coverings for façades, water repellents CAPILASIL to combat rising damp and to waterproof façades, BEALSTONE coverings, etc.
